

FirstPower Group LLC Maintenance School

Worthington V2A4 Compressor 3-Day Maintenance School

You will be exposed to many techniques that our technicians use every day in our shop that will drastically improve upon the time needed for routine maintenance in the field.

“Tricks of the trade” will be shared during the shop time and special tools used will be shown. Trouble-shooting and Diagnosis skills will be demonstrated on operating equipment to simulate actual field conditions.

Real world scenarios will be played out in test conditions to practice and review your equipment evaluation skills.

Suggested Accommodations:
