

Stinger® Fluids

All **Stinger® Fluids** sold by FirstPower are non-flammable and non-conductive. Stinger Fluids are safe to use on energized switches and reduce pull force to open switches. The Stinger fluid cans are designed to fit the Stinger and Stinger Hornet only.

The Stinger® & Stinger® Hornet deliver chemical solutions to fix switch issues safely and effectively. By dissolving corrosion, lubricating switches, and cleaning insulators, the Stinger & Stinger Hornet are an integral part of a switch maintenance program.

PATENTED

1FR Penetrant

- 1 FR dissolves corrosion on stuck components to make them operational again
- Designed for use with corroded parts, 1FR is an excellent choice for freeing Disconnect Switches and Rusty bolts

2NP Switch & Contact Cleaner

- Cleaner & degreaser for removing Contaminants, Oils, Adhesives, Tar, Sludge, or Corrosion
- Great for cleaning insulators

3PAO Lubricant

- Polyalphaolefin oil purposed for switch maintenance
- Excellent lubricity to assist in aligning switches during closing
- Medium-life, high quality synthetic oil
- Recommended for disconnect switches

Wasp Killer

- Sting back! Kill wasps with the Stinger
- Get to wasp nests in places an ordinary wasp spray can't reach
- A 20 ft spray distance is only so useful when the colony is sitting on a 30 ft structure. Use the Stinger Hot Stick tool to get close, while standing further away.
